M2 PRESSWIRE-13 February 1997-INTERMIND CORPORATION: Intermind Corporation announces European strategic alliances (C)1994-97 M2 COMMUNICATIONS LTD

RDATE:100297

Intermind Corporation, the **leader** in personalized information delivery for the Web and other electronic networks, announced today at Milia 97 in Cannes a comprehensive set of marketing and distribution partnerships for the European market with key distributors, software vendors, consulting firms and media partners in Europe, including The Kinnevik Group in Scandinavia, **Internet2000** in Germany, Trio Information System in Sweden, Groupe GFI in France, Centrum Systemow Teleinformatycznych TP.S.A. in Poland and Global One, a joint venture between Deutsche Telekom, France Telecom and Sprint.

These arrangements are designed to aggressively deploy a strong, well-rounded distribution strategy for this burgeoning market.

"We are thrilled that many key European organizations have responded so positively, giving us the ability and support needed to quickly establish a strong presence in this market and distribute Intermind Communicator to a wide breadth of corporate and home office users," explains Jerome Pache, director of business development at Intermind. "Global One, The Kinnevik Group, **Internet2000**, Groupe GFI and Trio are the kind of influential European partners we need to make our launch in Europe a huge success and gain the mind share of Web publishers in this market."

Global VIP, in partnership with Global One, has partnered with Intermind to assist in launching their technology in Europe. Managing Director of Global VIP, Clifford Kaplan said: "Intermind has developed the hottest new technology in their industry. We are very pleased to support the development of this revolutionary technology throughout Europe." Global VIP will also premier Intermind's "Communicator" technology on their new "Global City" CD. Global City is a virtual cultural city divided in communities which each represent a specific theme: Subway Theatre, Commercial Centre, Game Room, Educational Center for the Web, and an embassy for your language of choice.

Centrum Systemow Teleinformatycznych TP.S.A., the state telecommunications company of Poland, will distribute Intermind Communicator on 50,000 CDs throughout Poland. The application will be made available free of charge to students in virtually every city through the customer service departments of 72 subsidiaries of Polish Telecom. Intermind Communicator will also be sold to the public at educational fairs for a minimal charge, with all proceeds going to the schools. With the addition of Intermind Communicator, the CD-ROMs will contain everything that students need to access and publish information on the Web.

Additionally, Intermind Communicator -- among other new Internet solutions -- will be included in a CD that will be bundled with the March edition of Online Praxis magazine. The Online Praxis is a special edition of the PC Praxis, one of the most popular computer magazines in Germany, and also published in Austria and Switzerland.

What Intermind's Partners are Saying "We see an excellent fit for Intermind's technology with Kinnevik's Interactive Media strategy," said Johan Brenner, executive vice president at Kinnevik. "Intermind Communicator adds a unique value to many of our online offerings, ranging from shopping information to entertainment and we will in the near future, for instance, license Intermind Communicator under our 'everyday' brand, one of the most popular Scandinavian Web sites."

" **Internet2000** is proud to announce that it will represent Intermind

in central Europe and believes that Intermind has developed one of the key technologies to take the Internet to an even higher level of use," said **Axel Schultze**, president and founder of **Internet2000** and Computer 2000. "We decided to actively sell and support Intermind Communicator and its associated services through our **sales** channel of over 100 ISPs and VARs in Germany, Austria and Switzerland, because this technology is one of the most important recent developments of the Internet. Intermind's technology will have profound implications on business applications."

"The Trio/Intermind partnership is part of a new added-value program for our modem users. Our other partners include CompuServe, AOL, DT, Telia and Microsoft," said Finn Offergaard, Trio European OEM director. "Starting this month, Trio Information System AB will distribute worldwide the Intermind Communicator client on its new CD-series of communication products for modems. Intermind software service is an excellent complement to Trio software, and adds value to today's modems."

"Intermind Communicator is a key component of our Intranet offering composed of messaging, groupware and Web server applications," said Marc Urbany, Executive Vice President, Internet technologies, Groupe GFI. "Intermind's technology allows each of our business users to be rapidly notified of any news, updates and critical pieces of information related to the management and growth of our organization."

Intermind Corporation will be available for comment at Milia 97 in the Global VIP booth (No. 07.02). More information about Intermind can be found at <http://www.intermind.com>.

About Intermind Intermind is a rapidly-growing company developing advanced object-based communications technologies that enable individuals to have unprecedented choice and control in creating and maintaining communications relationships over the Web and other electronic networks. Intermind Corporation is a privately held company headquartered in Seattle, Washington, with backing from a number of prominent institutional and accredited investors. Jerome Pache will be available for comment at Milia Booth 07.02 in Cannes from February 9-12. Additional information is available at <http://www.intermind.com>, or by calling Seattle 001 206 812-8408.
